Change Google Groups Settings with GAT+

Users Audit & Management · https://gatlabs.com/knowledge/tech-tips/change-google-groups-settings/

In GAT+ an admin can change Google Groups setting directly from the tool.

Open GAT+ and navigate to Group audit.

Find any group you want and view their settings.

Click on the **group name** and details will be displayed in a new window.

Under **Groups** click into **Settings** to expand the view.

All the Options can be changed, some of the changes are with boolean values some are with custom text and so on.

Click on the "**pen" icon** and change the value or enter custom text, then on the **save blue icon** to save the changes.

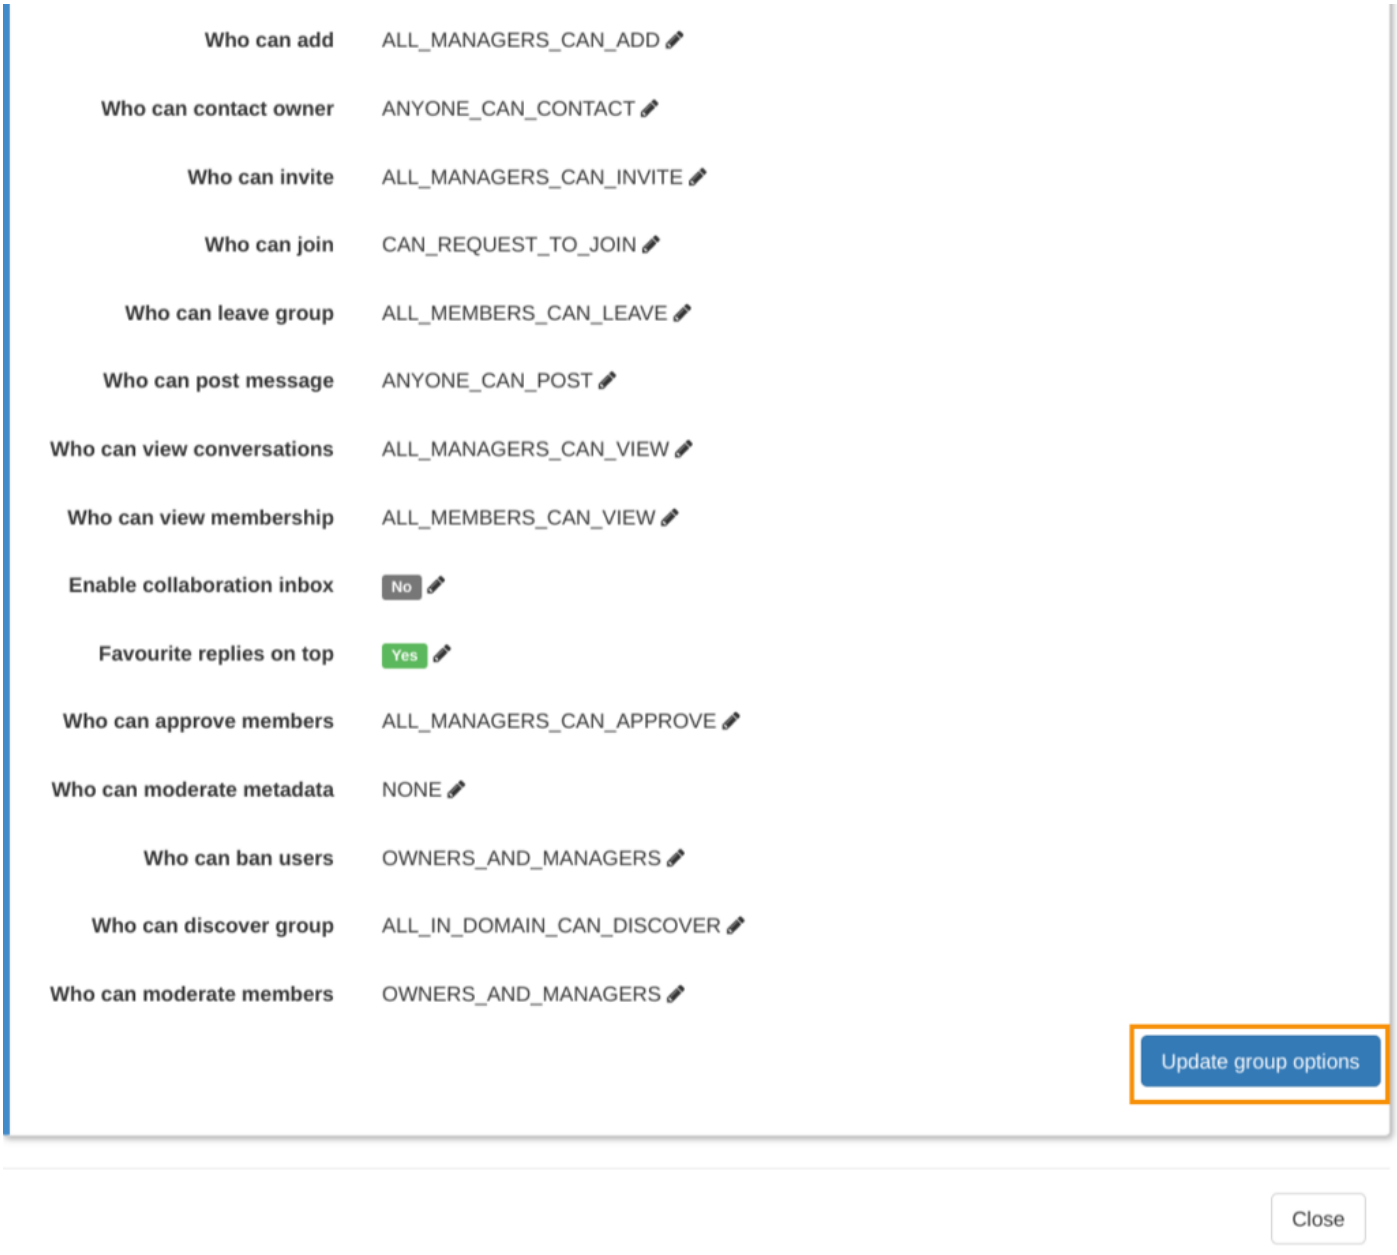
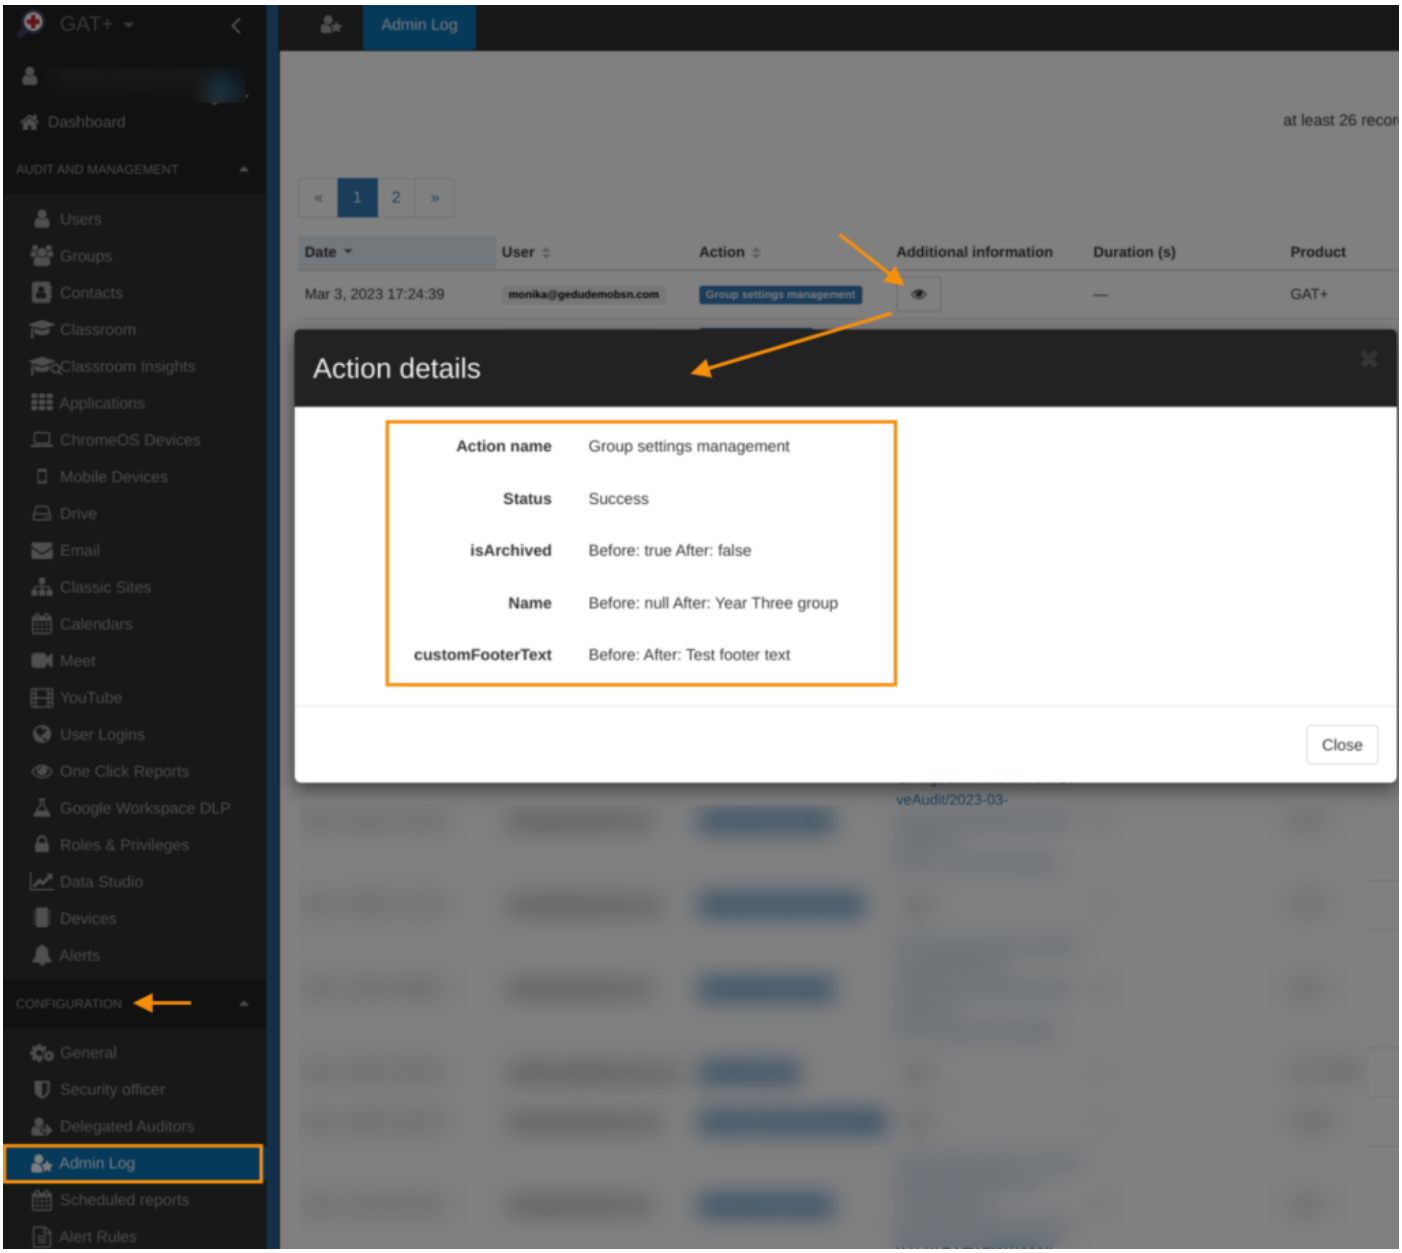
When all the changes are done, scroll down and **Update group options**



The changes can be seen in the **Admin log**



The changes will be reflected in the **Google Admin console** - **Groups** - All the changes will take effect.

The settings changes can be seen and reflected in **groups.google.com** those are the changes that can be done using GAT+ Groups - Settings

In the example above we can see the **Footer** and **Group names** have been updated according to the changes, we submitted via GAT+**.**
