Classroom Insights > Google Classroom Student Submission Summary

Classroom Audit & Management · https://gatlabs.com/knowledge/tech-tips/classroom-insights-google-classroom-student-submission-summary/

Introduction Google Classroom

Using the metadata retrieved using GAT+. The Google Classroom Insight area includes information about submissions of assignments. The Student Submission Summary tab will display the students and their submissions in greater detail.

This can be useful if an **admin, teacher, or guardian** needs to present data of students' submissions activity to the school.

Delegate access.

Learn how to delegate access to non-google super admins here.

Student Submission Summary

This section is where the **admin, teacher, or guardian** can view Students' names and the classroom they are enrolled in.

For each of the **Classrooms**, the admin or auditor will be able to view the **Assigned** work.

Assignments

For the Assigned work - how many are **submitted**

Submissions

For the Submitted - how many are **submitted on time, submitted late** or **not submitted**

Reports

The percentage of **Submitted only classwork** and **overall** (including not submitted (given score of 0).

How to access

In **GAT+** navigate to **Classroom Insights** from the left-hand menu.

From the top bar click on the tab **Student Submission Summary**

As a result of this summary table, a list of **students** will be displayed, alongside the **OU** they are located and the **classroom name**.

All the data you want in one place.

In terms of **Classworks**, you can see:

- Assigned
- Submitted
- Submitted on time
- Submitted later
- Not submitted
- Score percentage
- Submitted only
- Overall

For each of the Classrooms, the **percentage** will be displayed for each of the **classwork.**

Noteworthy

If the student submitted, but the teacher has not graded it (or not graded it yet) we are treating it as 0.
So if a student submits an empty assignment it is treated as 0

- **Submitted = only if student-submitted classwork**
- **Overall = for not submitted we're treating as 0 points**

Apply filter to search for specific use-case and find the results you need.

Export the data

The data can be exported into Google Spreadsheet or CSV downloaded.

The Spreadsheet will be presented as below and additional filters can be applied
