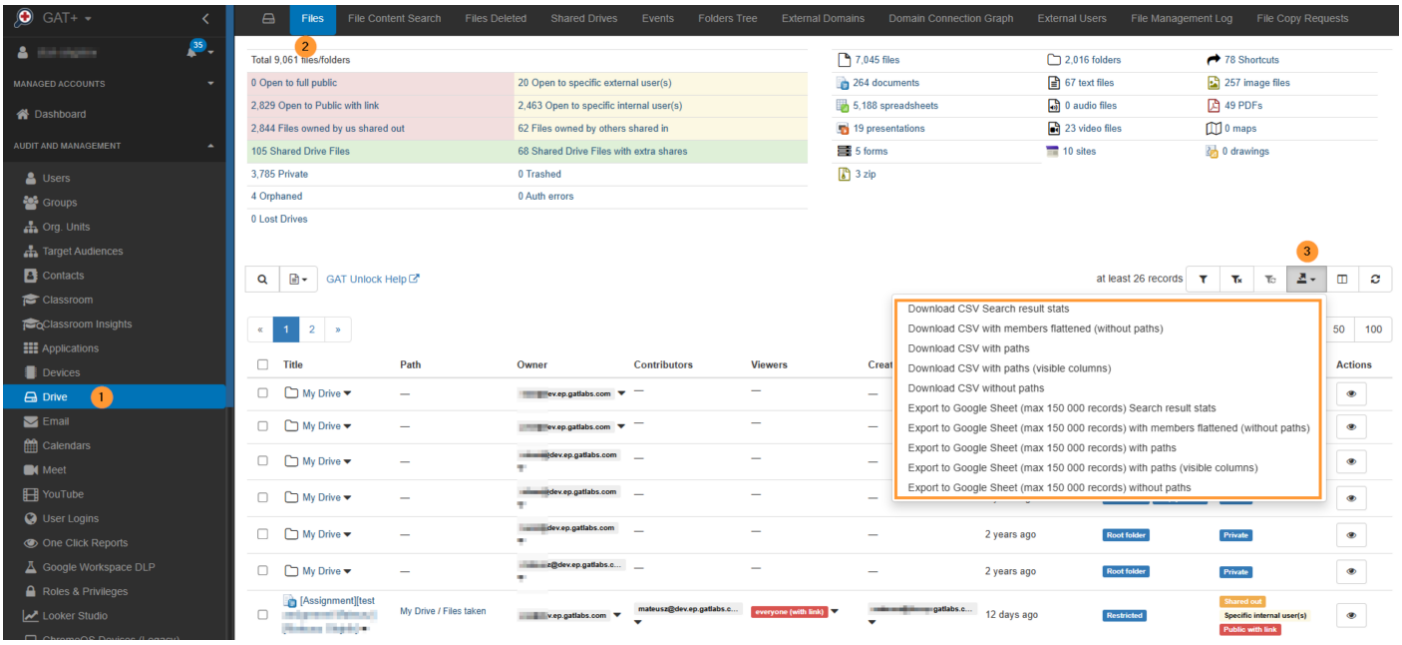
Google Drive Audit Export Options

Drive Audit & Management · https://gatlabs.com/knowledge/tech-tips/google-drive-audit-export-options/

Google Drive Audit

When you need to export the search results data to a CSV or Google Spreadsheet, there are several options:

Navigate to **GAT+ > Drive > Apply the filter** you need and select the Export button.



Export options

The data can be exported into Google Sheets or CSV format.

Search result stats

Export as one row with the result stats

With members flattened (without paths)

Each file/folder is represented by one or more rows. Each row contains just one member, so a number of rows per file/folder depends on the number of its members

With paths

Each file/folder is represented by just one row

With paths (visible columns)

Each file/folder is represented by just one row - (visible UI columns only will be in the export)

Without paths

Each file/folder is represented by just one row. Paths are not exported at all
