How to install GAT+

Getting Started · https://gatlabs.com/knowledge/tech-tips/how-to-install-gat/

GAT+ is a Google Workspace Audit tool that, by default, can be installed only by the Super Admin of the Domain.

Install GAT+

How to install GAT+ Video

Embedded media:

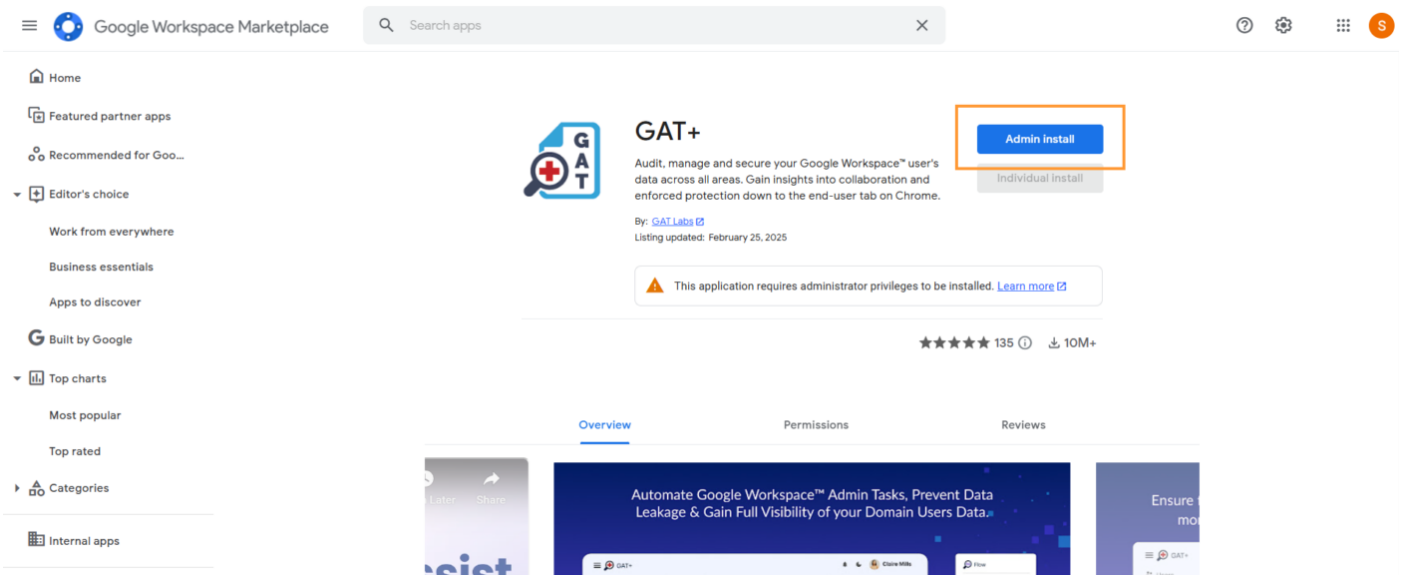
Step 1:

First, log in **to your domain** with the **Super Admin Account.**

Navigate to > Google Workspace Marketplace > You can also search for GAT+ in the search bar.

When GAT+ is selected, click on **Admin install**

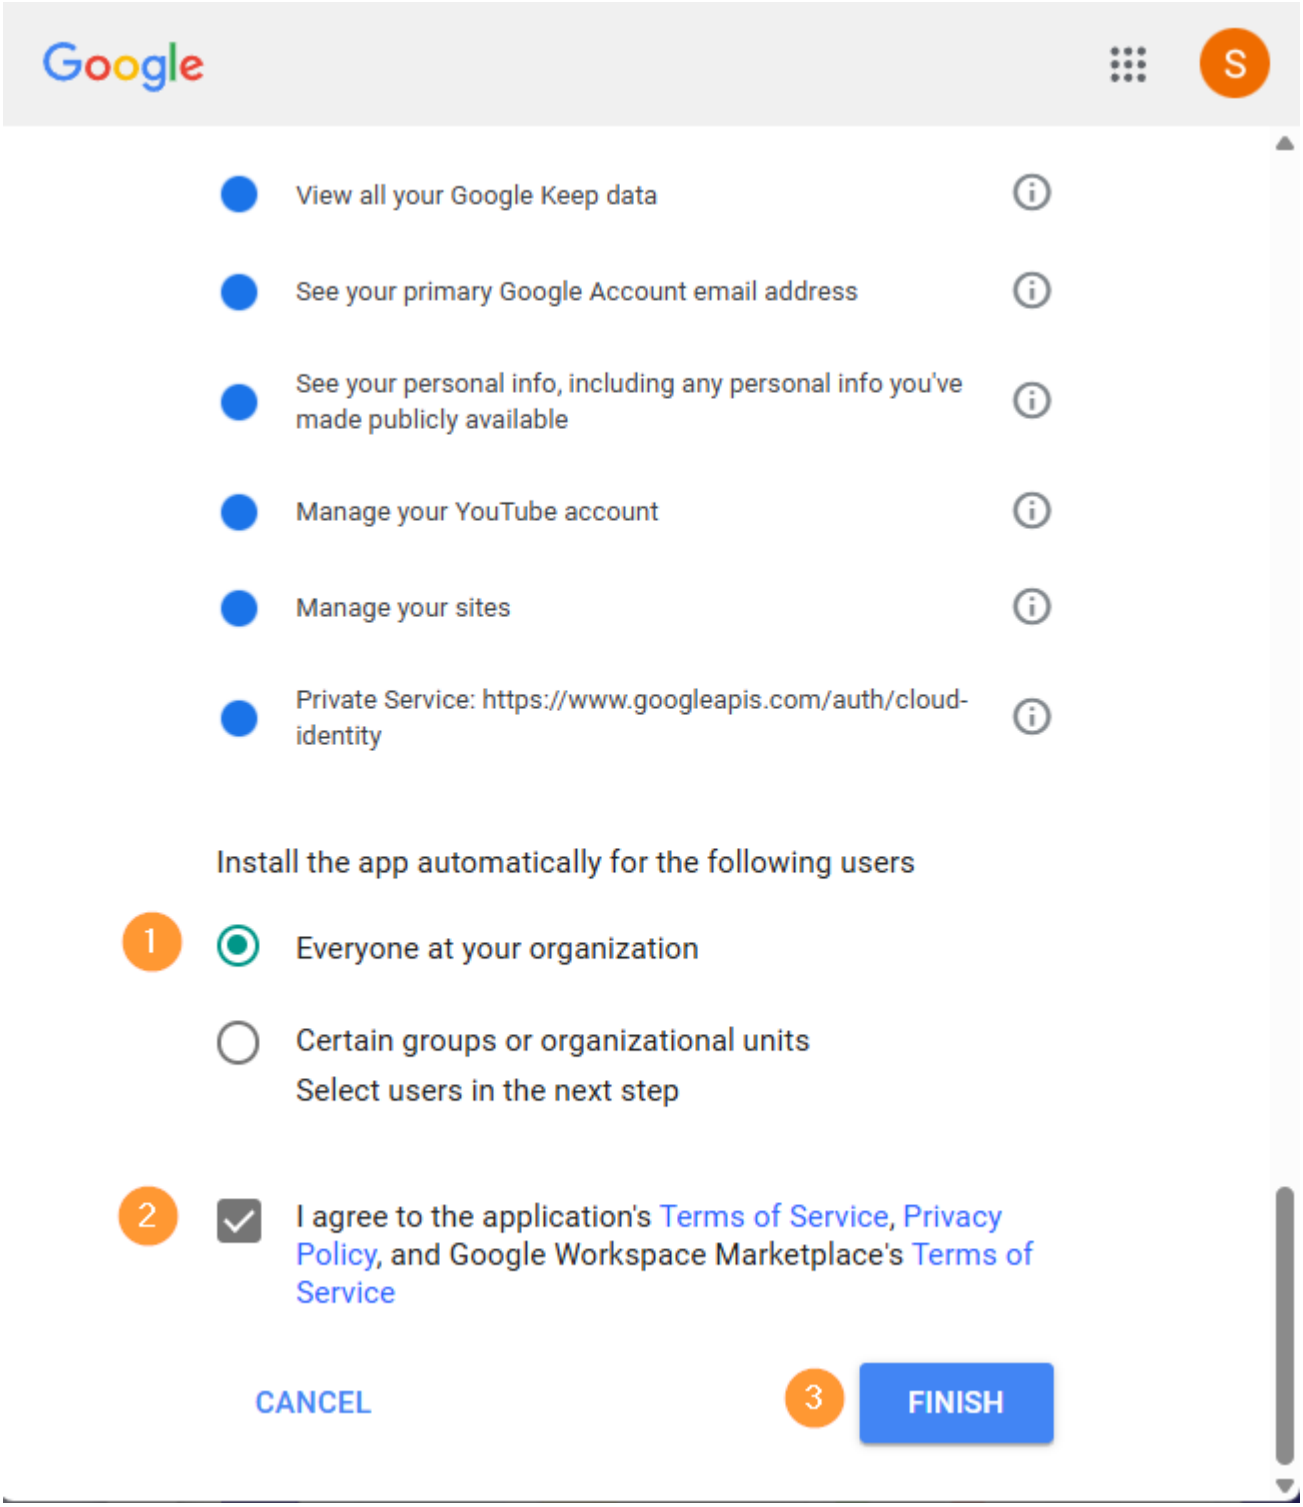


A pop-up window will be displayed by clicking on "**Continue**".

Then a new pop-up will be shown with all the permissions required.

Scroll down to the bottom.

- Under: **Install the app automatically for the following users**
  - Select "**Everyone at your organization.**"
    - **Note:** installing on certain groups or Org. Units will not give clear and accurate data stats of the domain data
  - Enable **the checkmark** - "I agree to the application's terms..."
- Click on **Finish**

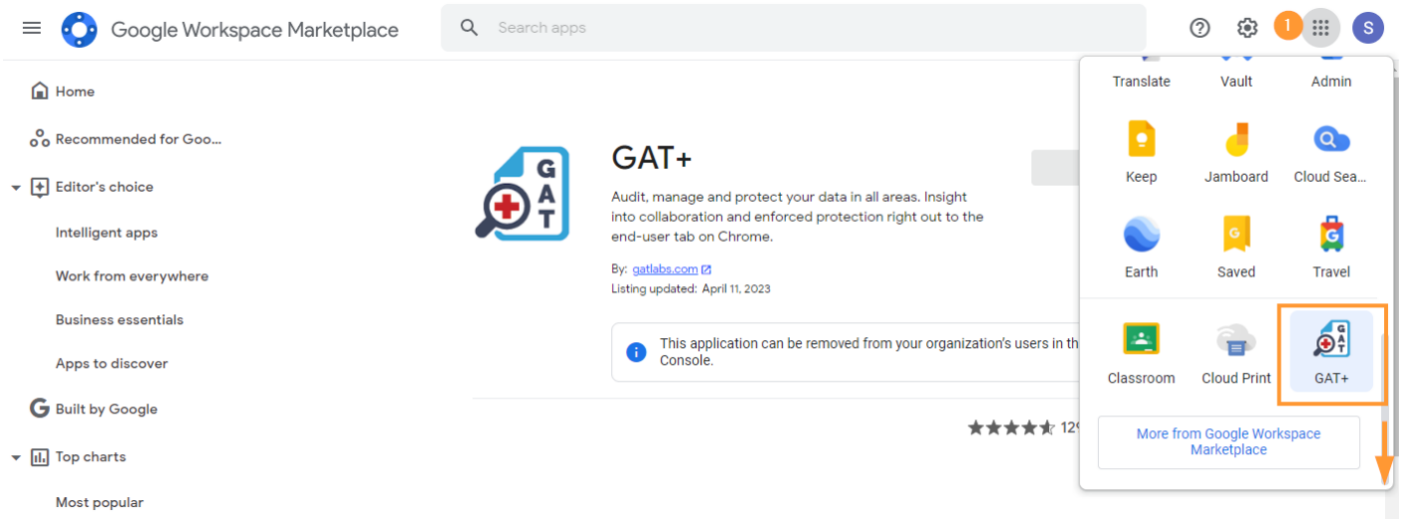


> **Note:** You can **not install** it from an incognito window unless you are **signed in to your Super Admin account.**

Result

GAT+ will be installed.

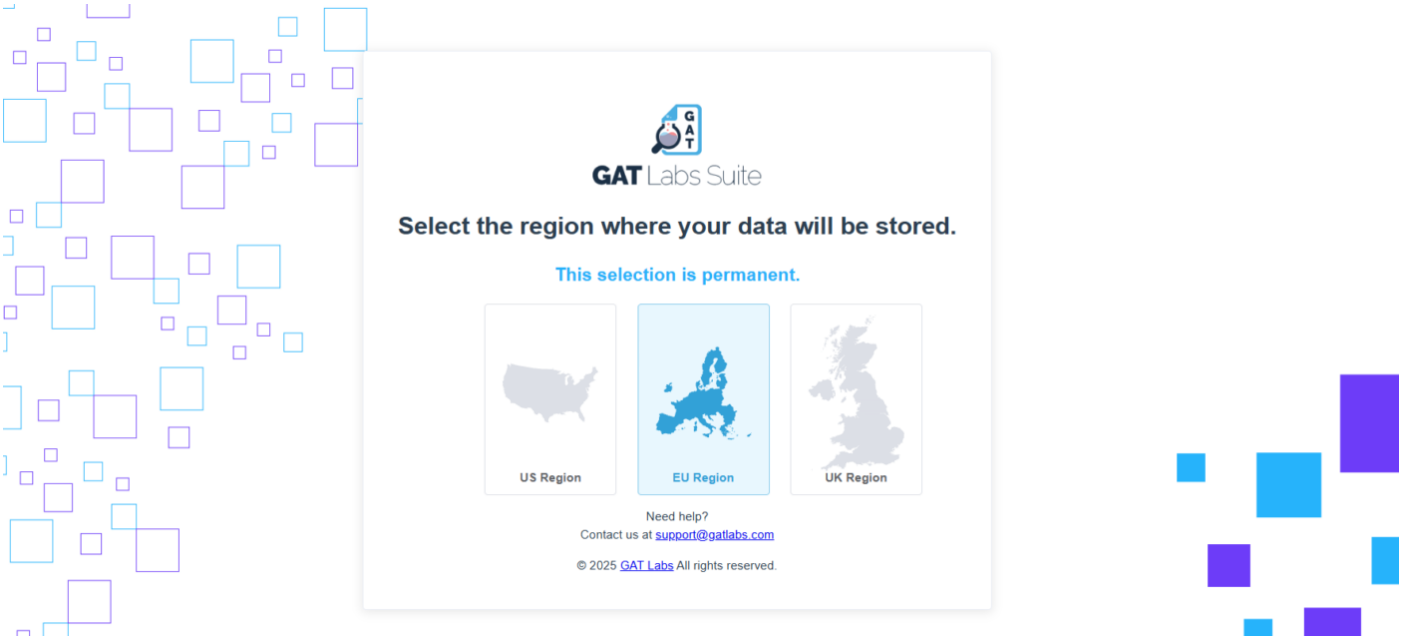
When installed, **click** on the **Google apps button** and scroll down to the **GAT+ icon**



Select Region

When you launch GAT+ for the first time, you will have to **select a region where data will be stored.**

This selection is permanent.



Select the Region where the data will be stored.

- **US Region -** United States
- **EU Region -** European Union
- **UK Region -** United Kingdom

Once the region is selected, GAT+ will be opened up for you.

This will be the **initial login,** and the **initial scan** will be started.

The time for the initial scan to complete will depend on the size of the domain.

- The number of users
- The number of Drive files, etc

Estimate the time of the initial scan

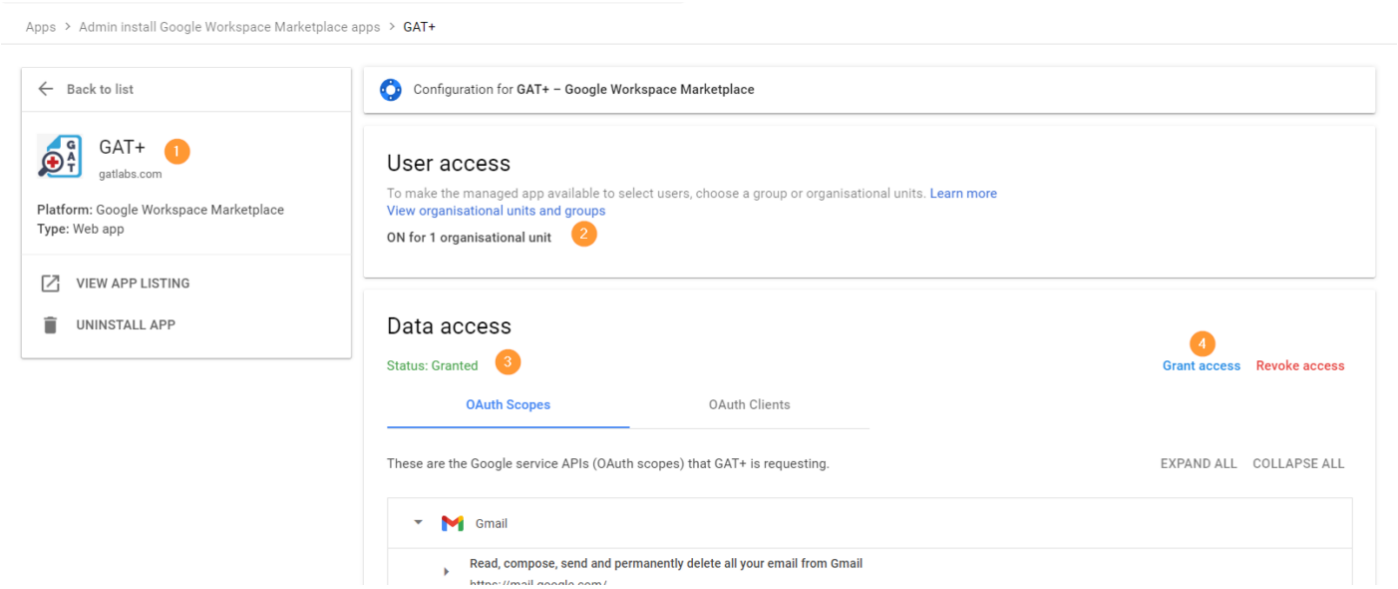
We estimate the initial scan to take 30 minutes per 1 million files. When the scan is completed, an automatic email will be sent to the Admin account.

Note: Subsequent scans will be faster.

When the initial scan has been completed, the data from your domain will be displayed in the GAT+ console.

Data access

To view and access the full domain data (metadata), we recommend that GAT+ be installed **domain-wide** and **all permissions be granted**.



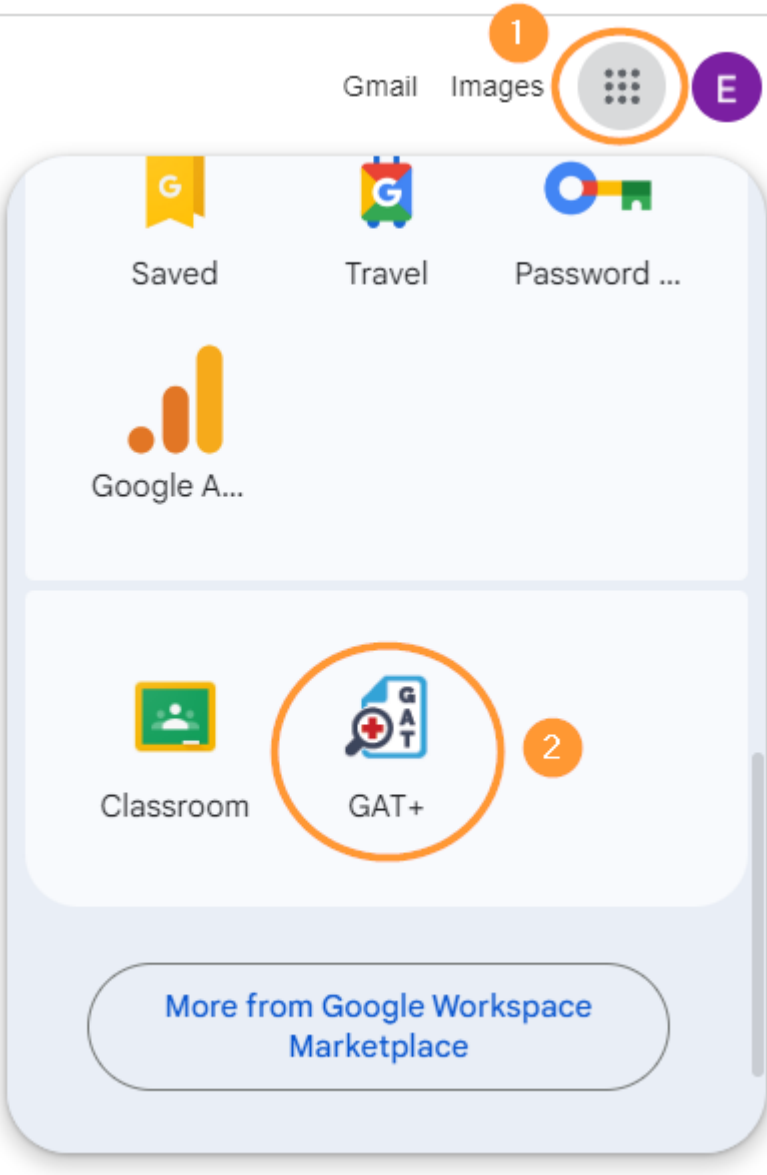
Access GAT+ by Super Admins only

By default, the tool can be accessed **ONLY by Super Admins** of the domain.

Non-admin accounts can see the GAT+ application under their Google Apps option, but CANNOT launch the tool itself.

When the tool is installed domain-wide, it can be launched from the **Google Apps** menu.

Click on the **Google Apps** menu button, scroll down to third-party apps, and click on **GAT+**



This will **launch GAT+** into a new window on your browser.
