Bulk Change ChromeOS Devices to different OU’s with GAT+

Chrome Audit & Management · https://gatlabs.com/knowledge/tech-tips/bulk-change-chromeos-devices-to-different-ous-with-gat/

GAT+ provides an extensive audit of enrolled ChromeOS devices of the domain.

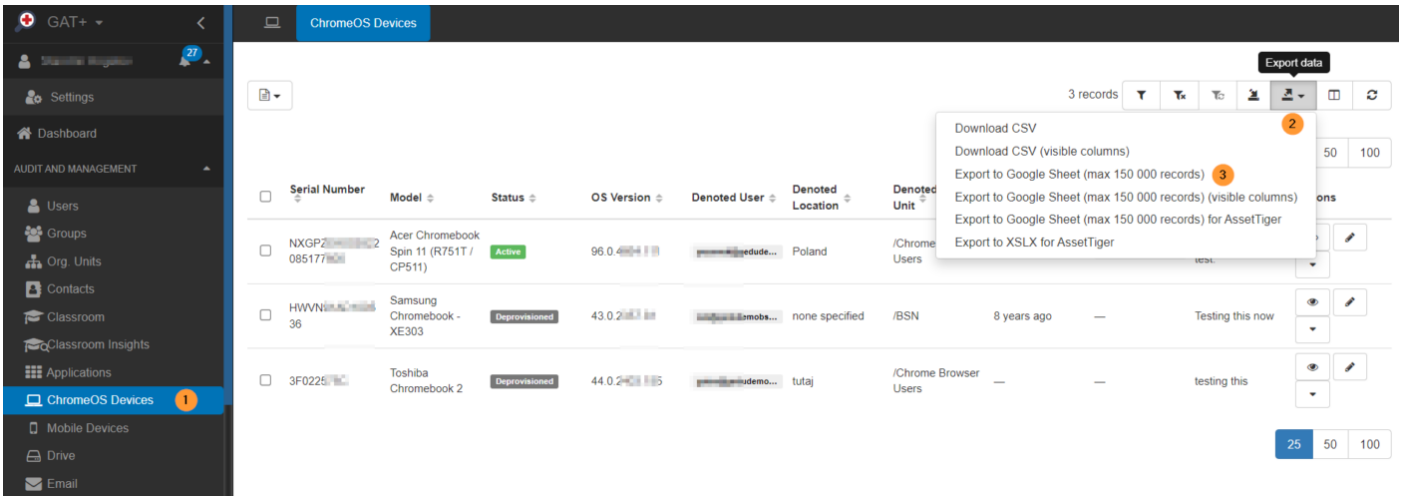

This audit allows the Admins to take action on devices such as deprivation, disable, and re-enabling them.

With GAT+ Admins can also move ChromeOS devices from one **Organizational Unit** to another in bulk.

Follow the steps below to change ChromeOS Devices in bulk to different OU's

1. Export data

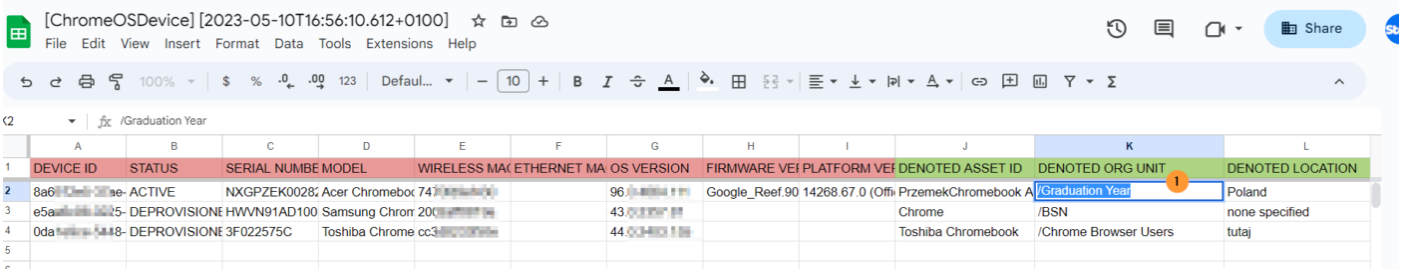

Navigate to **GAT+ > ChromeOS devices > Export data**

Export the ChromeOS devices into Google spreadsheet.

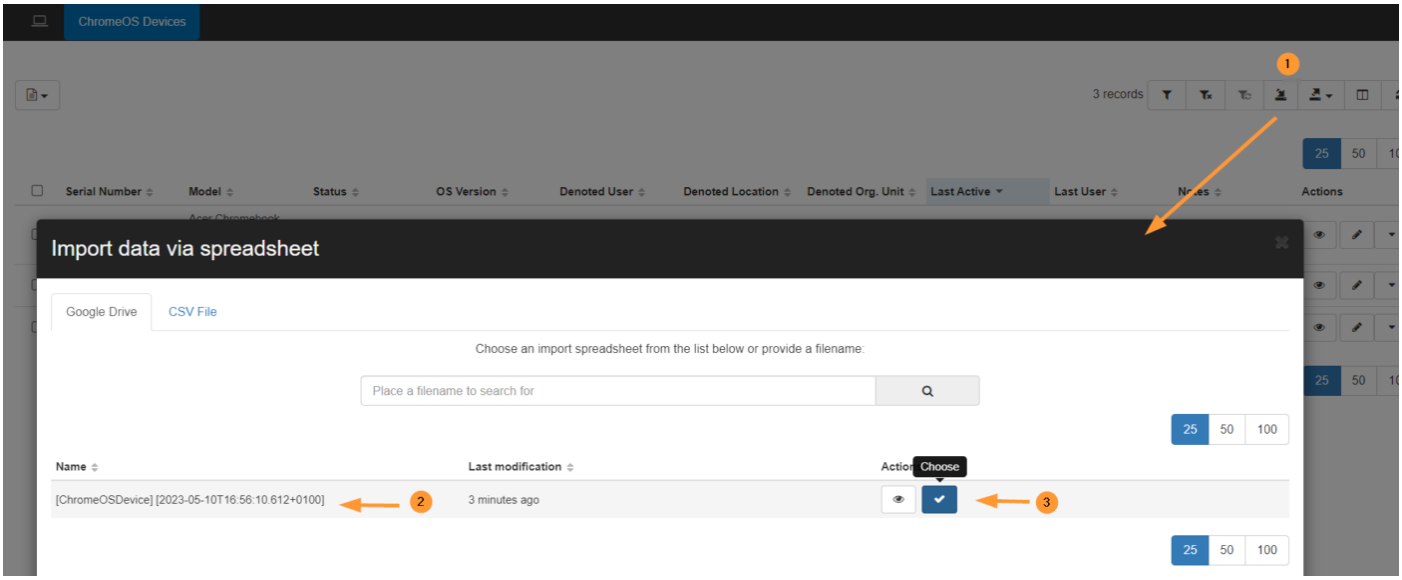

2. Change Org. Units

In the spreadsheet navigate to Denoted OU's field and **change the denoted ChromeOS Devices OU** to the desired one:

Save the Google spreadsheet and **import the changes back.**

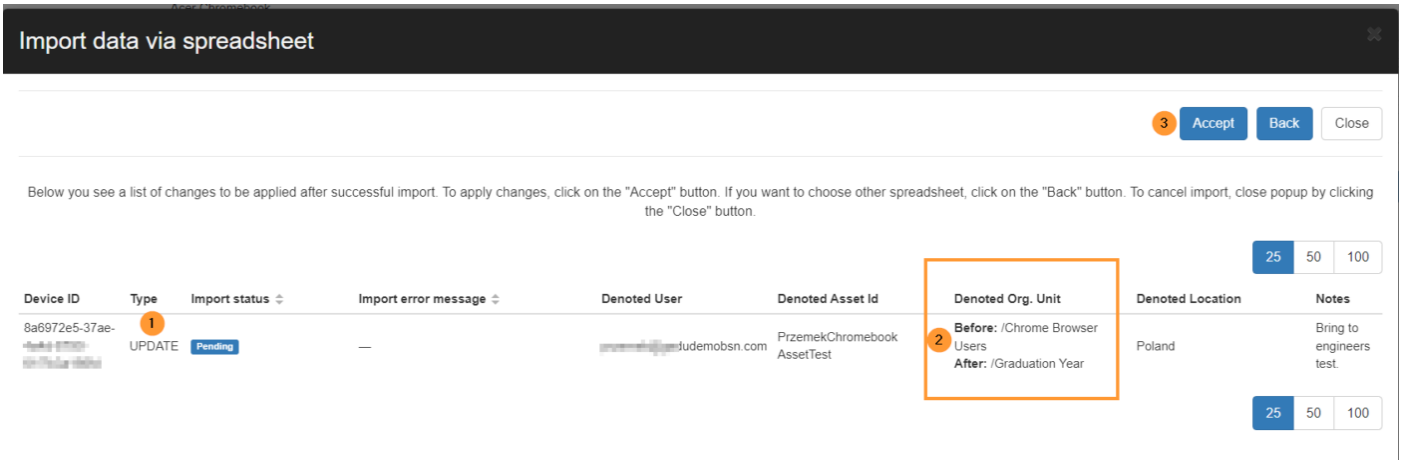

Click on the "checkmark" and you will see the changes that will be applied - **Before > After**

3. View changes- ChromeOS Devices OU

Click on the "checkmark" and you will see the changes that will be applied - **Before > After**

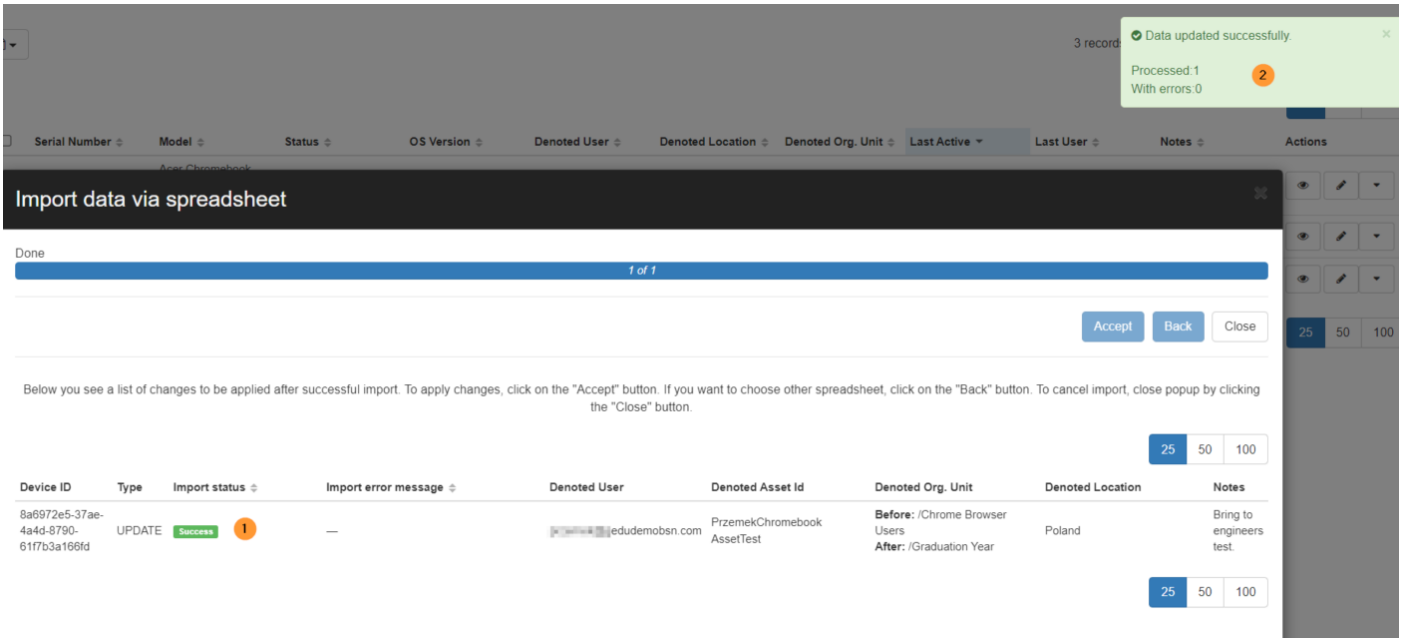

Selecting the "eye icon" will open the spreadsheet again.

When the changes are reviewed and all is as expected.

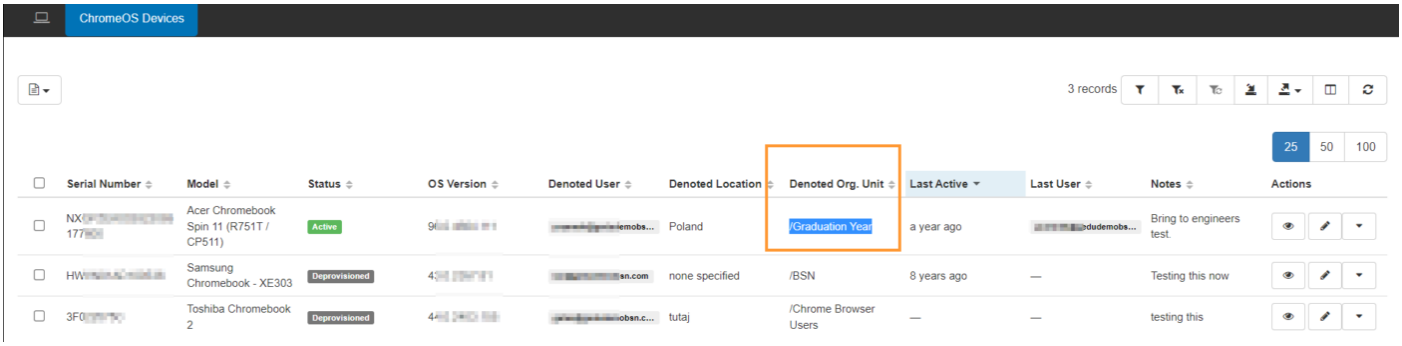

4. Apply changes

Click on **Accept** - and the Org Unit **will be changed**

5. Result

As a result, the **ChromeOS Device OU** will change

You can perform the above action for **all/bulk devices at once.**
