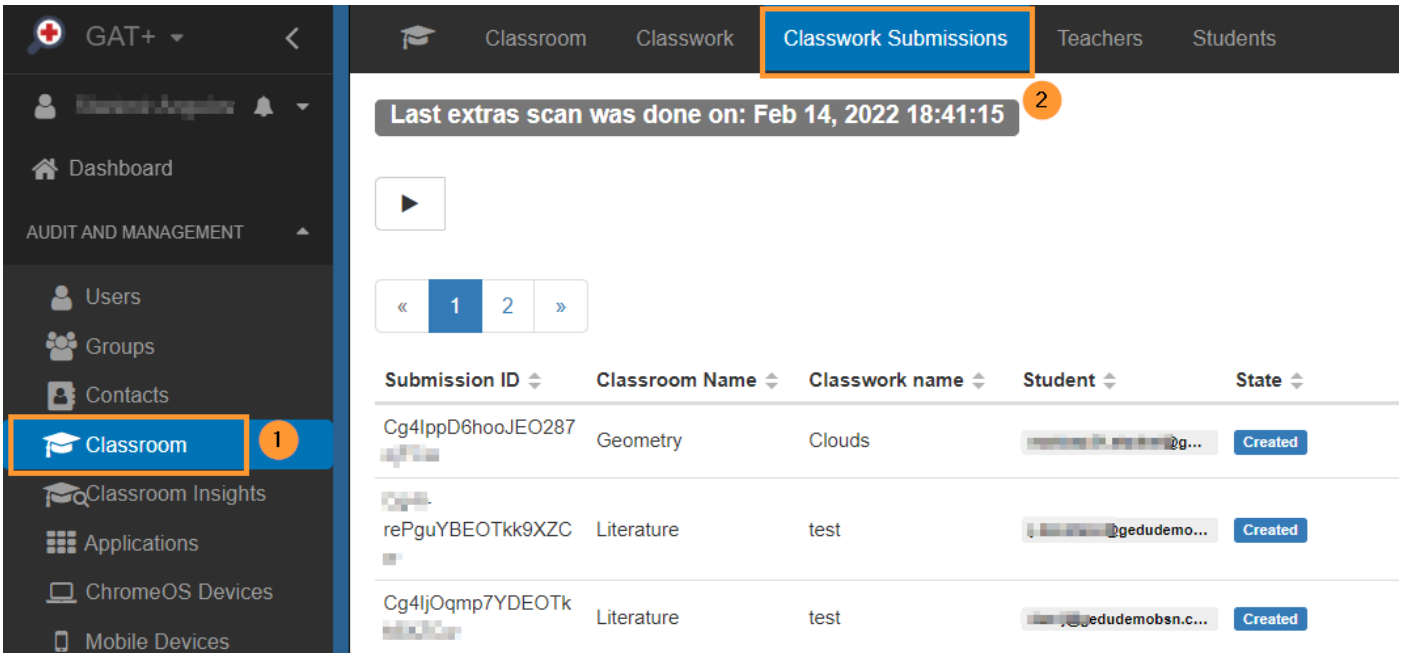
Students who have Not Submitted Work for Assignments (Google Classroom)

Classroom Audit & Management · https://gatlabs.com/knowledge/tech-tips/unsubmitted-assignments-by-students-within-google-classroom/

Using GAT+ you can run a report to **see which students did not submit an answer for an assignment** created by a teacher within Google Classroom.

To generate this type of report, follow these steps:

Launch GAT+ and navigate to **Classroom > Classwork Submissions** tab.



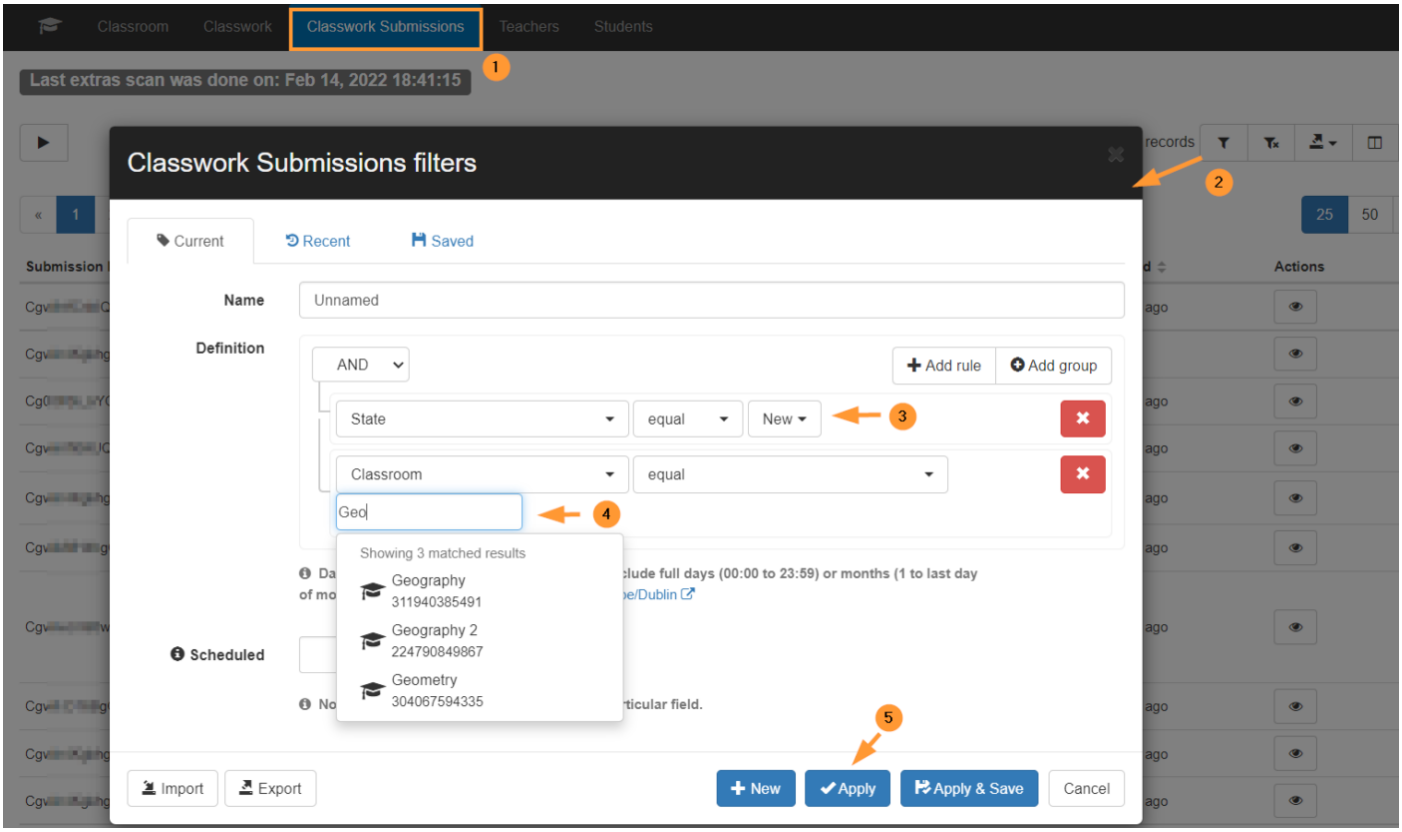
Admin can apply filters to find what they are looking for.

Apply filter

For example:

- **State** equal **New**
- **Classroom** equal - enter the classroom (when selected the ID of the classroom will be displayed)
- **Apply** - click to apply the filter

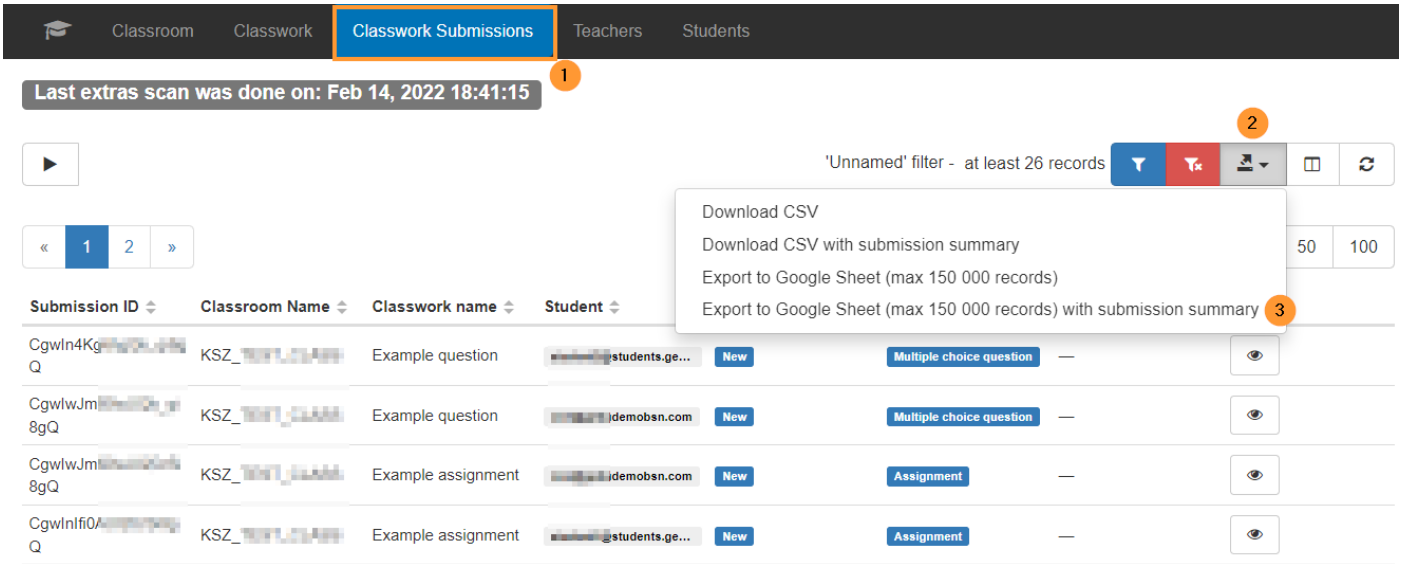
New means that work was not uploaded or submitted.



Result

The result that appears is a list of students who have not submitted any work for the assignments within that classroom.

You export the results to a Google Spreadsheet (with submission summary)



If you wish to see all unsubmitted work by students do not narrow the filter to a particular classroom.

In the Google sheet, the Admin can filter by more details.

Filter by

- Submitted - number of submitted work
- Not submitted - number of not submitted work
