Delete app-specific passwords

On-boarding, Off-boarding & Modifying · https://gatlabs.com/knowledge/tech-tips/delete-app-specific-passwords/

GAT Flow is a User management tool (part of the GAT Suite of products). It allows Google Workspace Admins to Onboard**,** Offboard, and Modify users of the domain.

It also allows taking bulk action on multiple users at the same time.

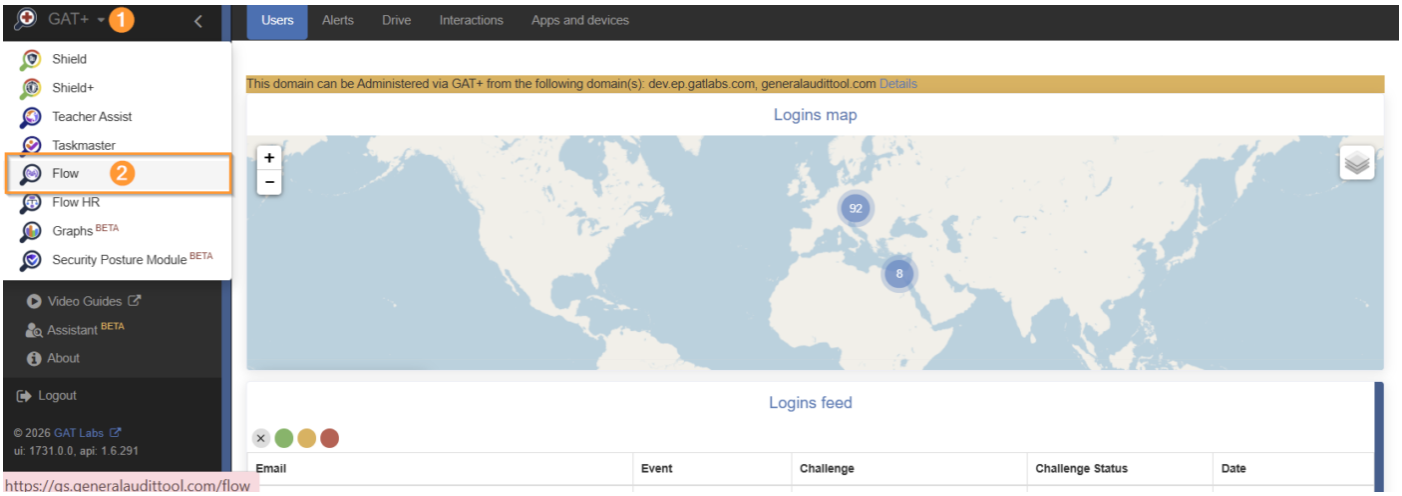

Delete app-specific password is one of the actions that can be taken using Flow.

***Note:** App Passwords can only be used with accounts that have 2-Step Verification turned on.*

This action can be applied in **Offboarding** and **Modifying** workflows, including Event and Recurring workflows

Set up Flow

Open **GAT+** (1) and select **Flow** (2) from the the pop-up menu.

Create Workflow

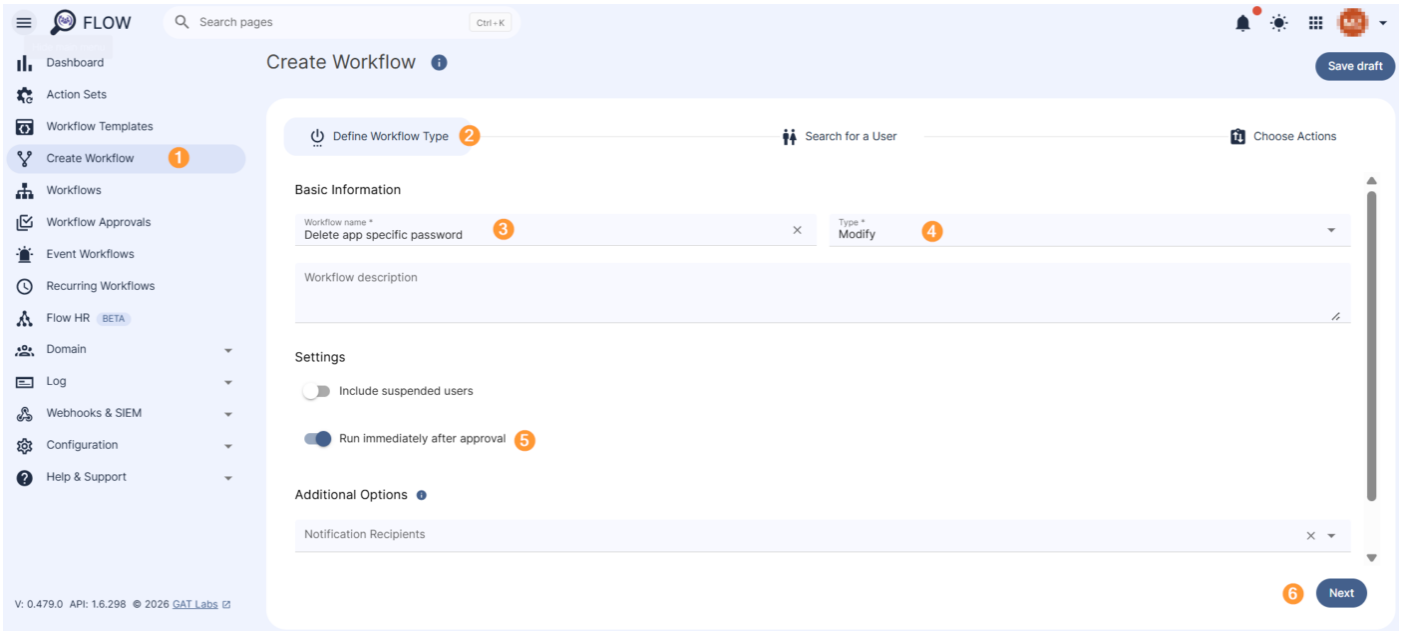

GAT Flow will be open on a new tab.

From the menu on left, click on **Create workflow**.

Define Workflow Type

A **Define Workflow Type** section will be displayed.

- **Name** – enter a name for the workflow
- Description – a description of the workflow can be added (optional)
- **Type** – select the workflow type
  - **Modify** – modify and update existing users of the domain
  - **Offboarding** - remove or deactivate user (delete, archive or suspend)
- **Run immediately after approval**
- **Next** – click on the button to proceed

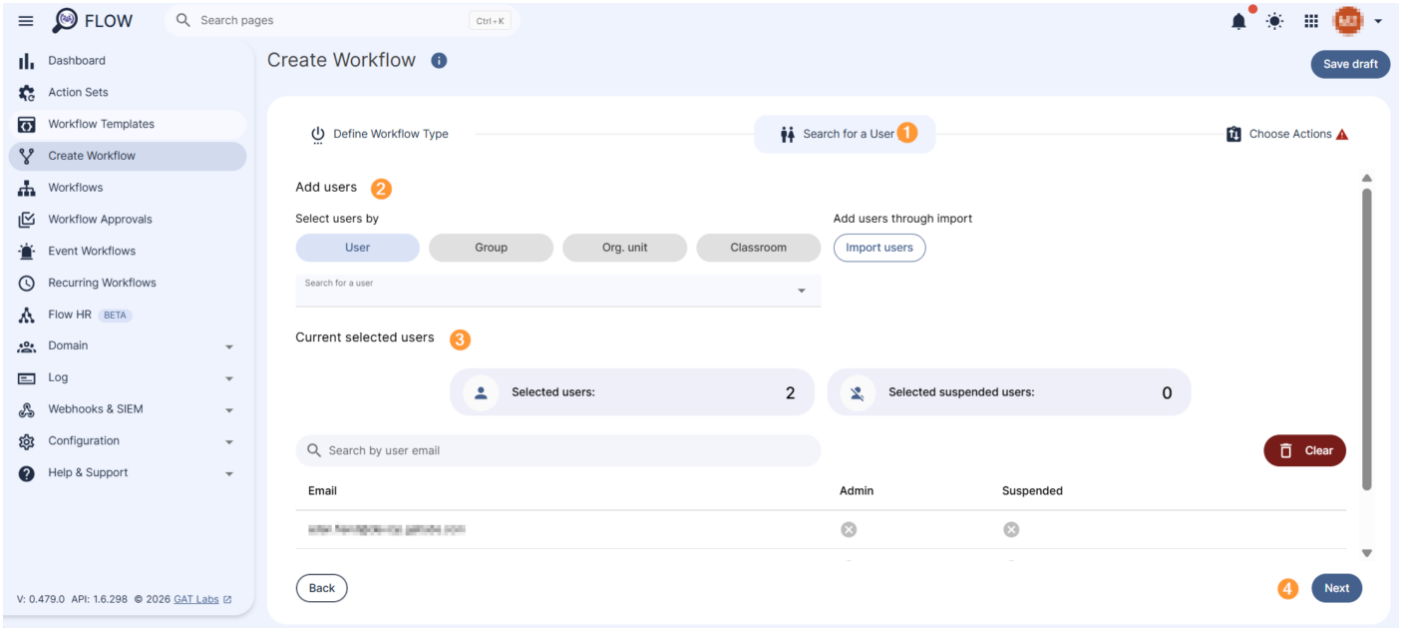

Search for User

In **Search for a User** (1-2) pick any of the option

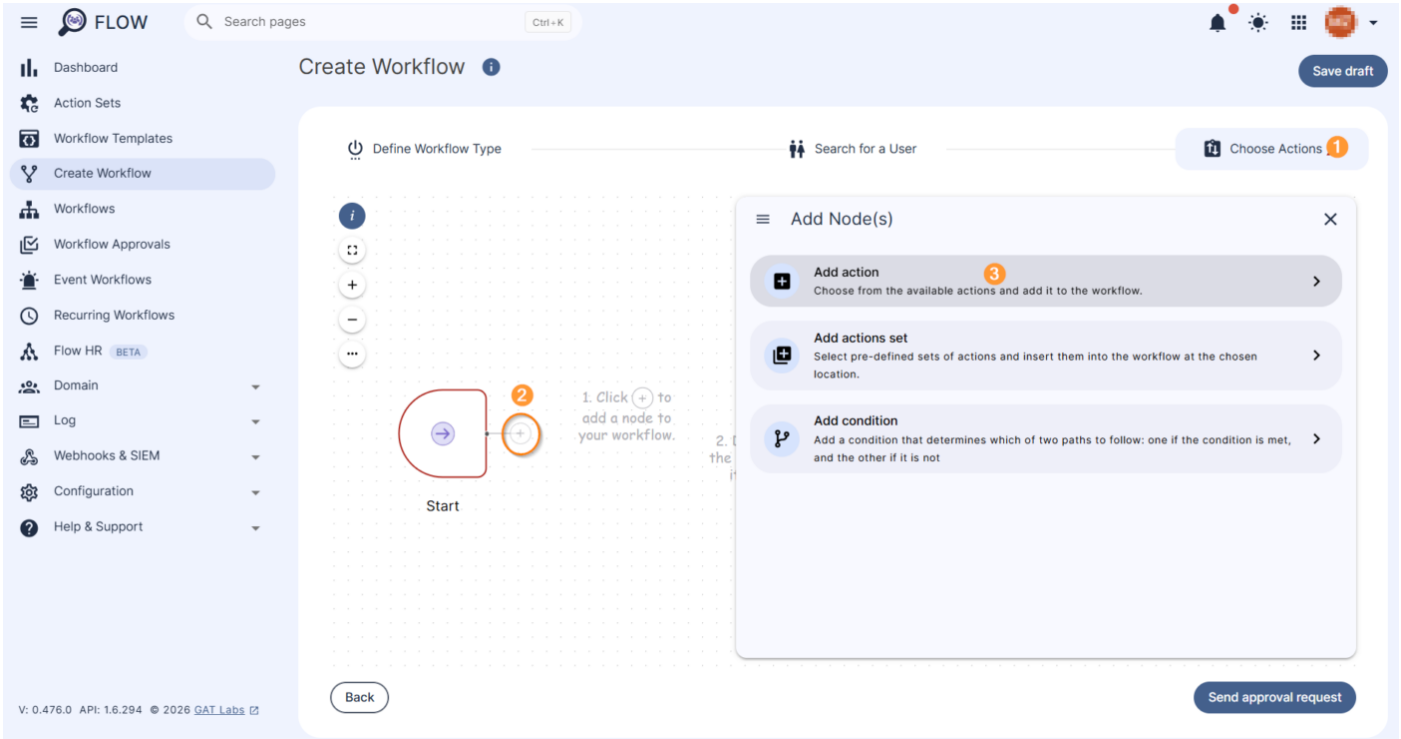

- Search for a **User** – select individual users
- Search for a **Group** – select a group of users
- Search for an **Org. Unit** – select Org. Unit of users
- **Classroom**
- **Import users –** import used via Google spreadsheet

Check the list of selected users under Current selected users section (3), and click **Next** (4) to move on to the next step.

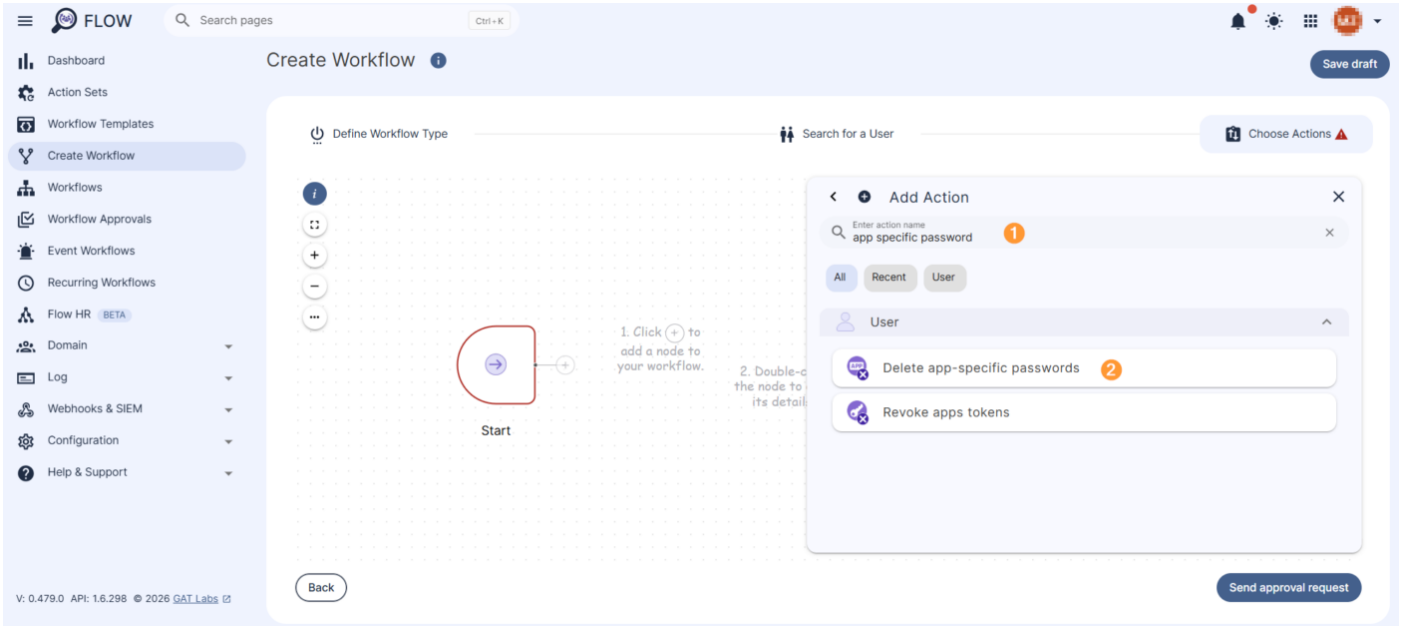

Choose Actions

Under the Choose Actions section (1), click on the + button (2) and Add action (3). A pop-up menu with all the available actions will be displayed.

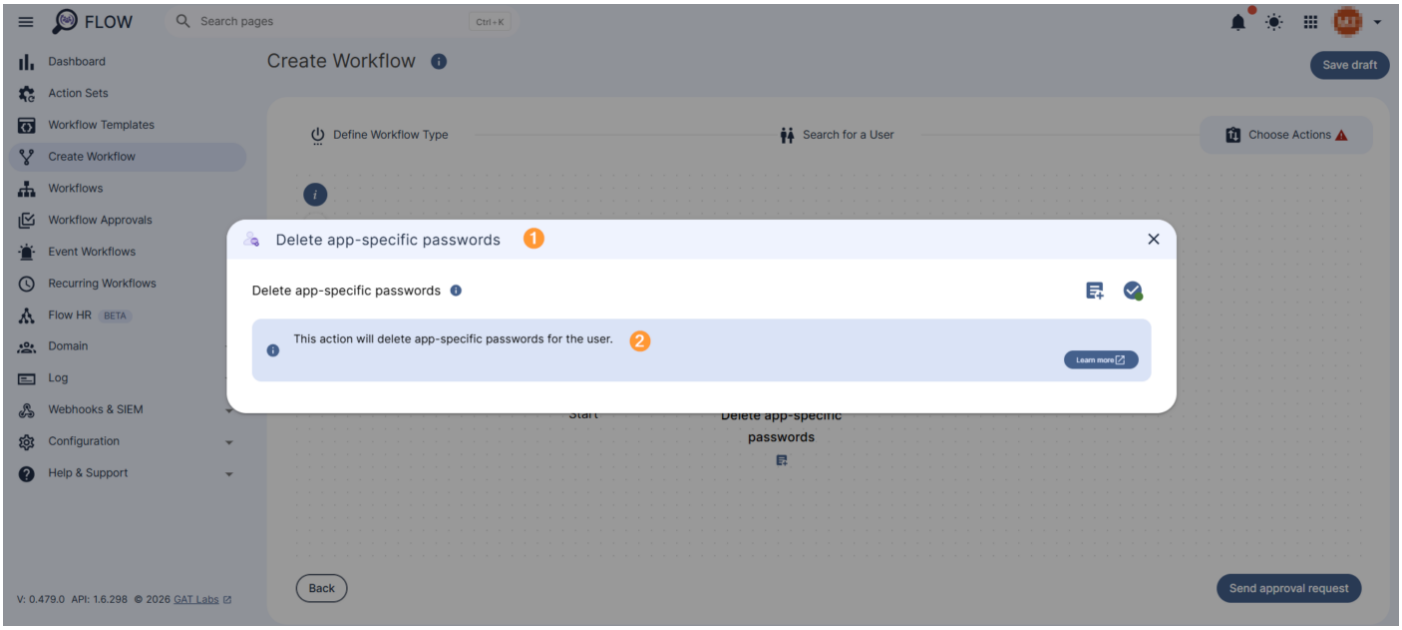

If the process hasn't been set before, please use *Add action* button and create the node.

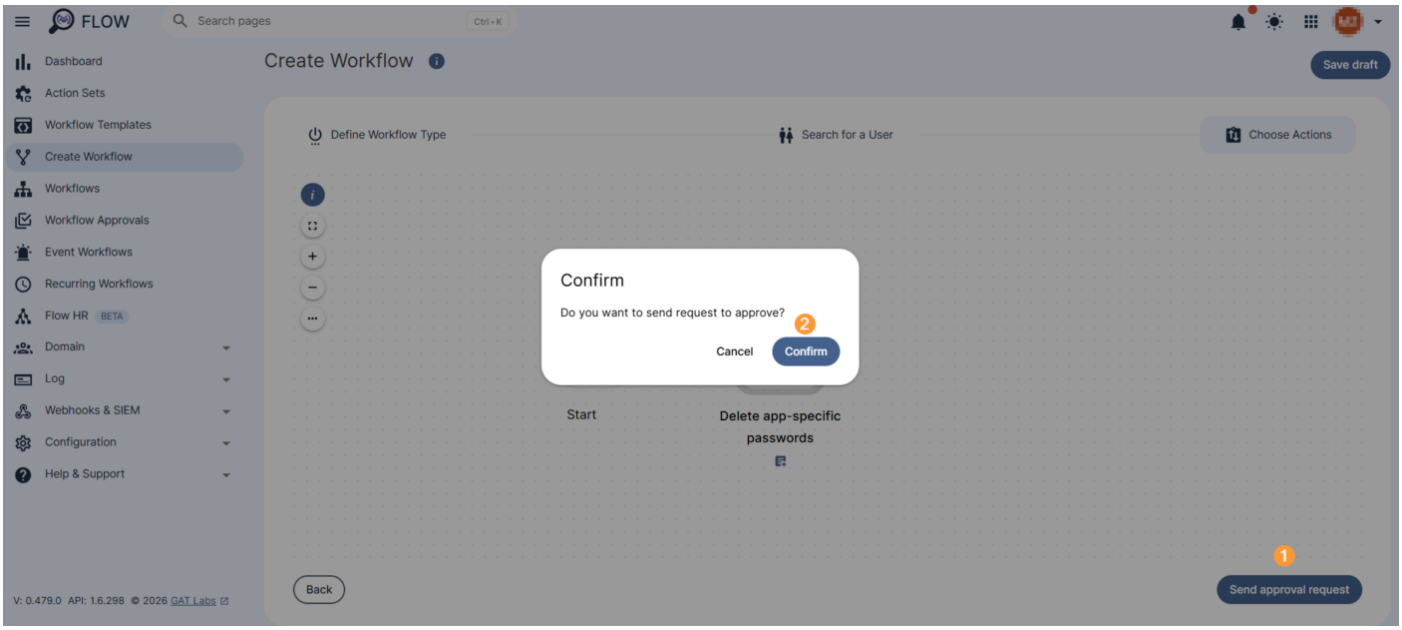

From the menu that appears, search and select the **Delete app-specific passwords** action.

Once the action is selected, it will be added to the node section. Double click on the action node to open the action's section.

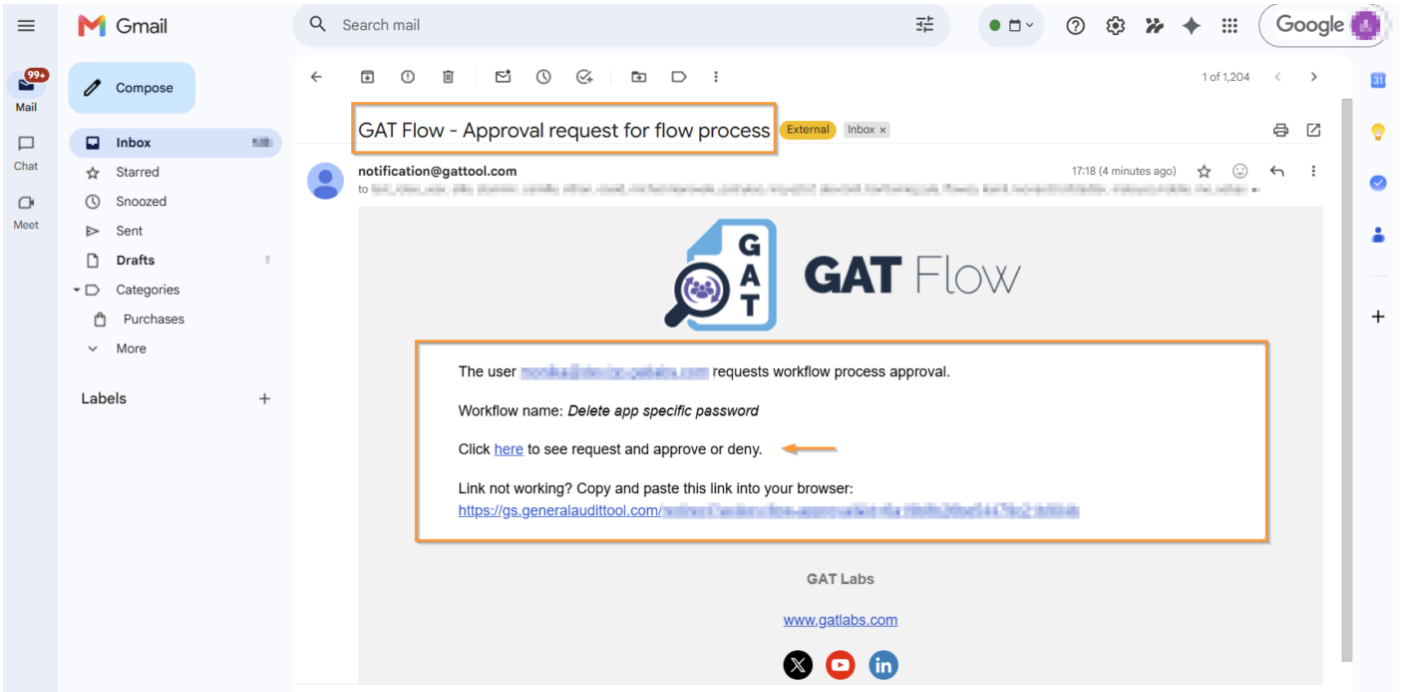

Click the **Send approval request** button, and then Confirm to proceed.

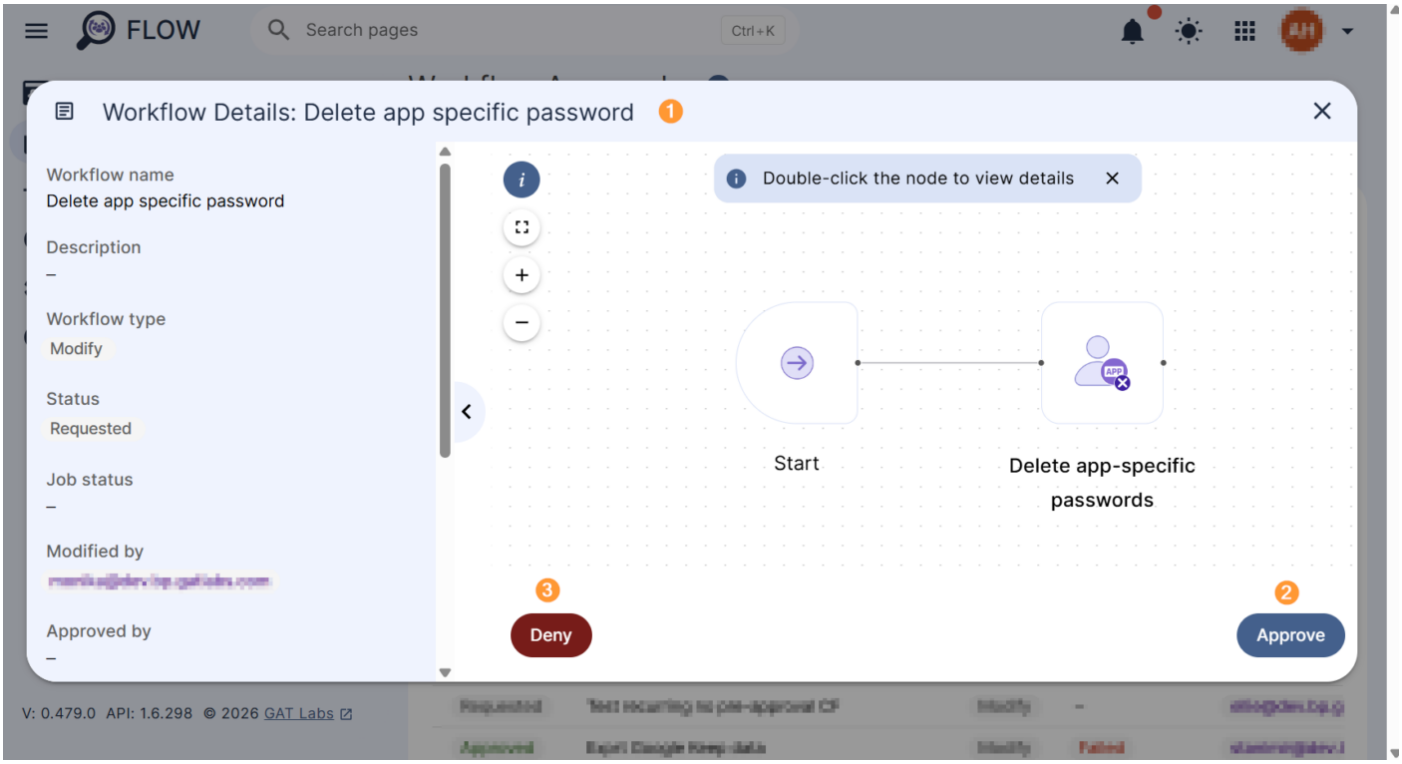

Security Officer Approval

The Security Officer will receive an email for approval unless pre-approval is deployed.

This will take them to the **Approval** page, when approved the job will be set to run.

Result

When the request is approved, the **App-specific passwords for the selected users will be deleted.** The result can be seen in **Flow > Workflow**

The app-specific passwords can be found in Google Account settings
