How to Enable ‘Safe Search’

Chrome Audit & Management · https://gatlabs.com/knowledge/tech-tips/how-to-enable-safe-search/

How to Enable 'Safe Search'

Configuration section for the Search Access module.

This module is responsible for filtering out explicit content from search results (including images).

When options are not enabled browser default or a user's personal are used.

Note that it may take a while for settings to propagate to extensions.

GAT Shield supports this '**Search Access**' feature that allows Admins to enable **Safe and Image Safe Search**

'Safe search'

SafeSearch helps you manage explicit content in your search results.

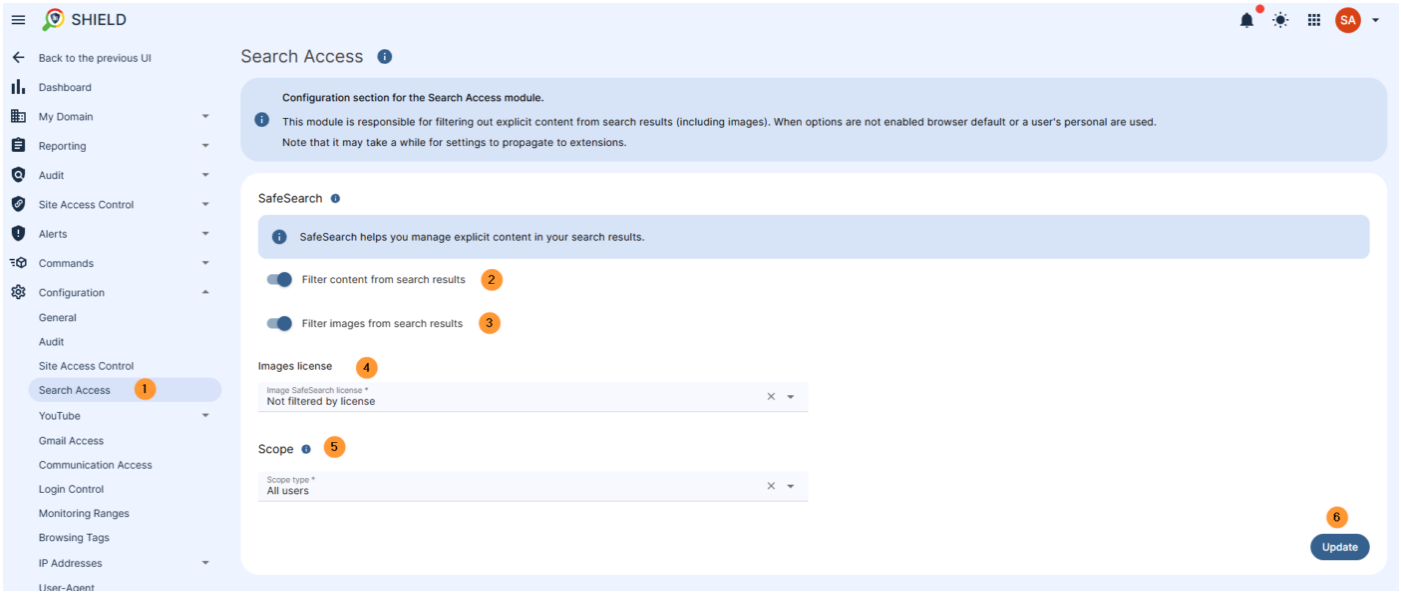

Image Safe Search

The image safe search can be applied with different options to be selected

- 'not filtered by license'
- 'labeled for reuse'

- 'labeled for reuse with modification
- labeled for noncommercial reuse with modification
- 'labeled for noncommercial reuse.

Scope

Select which users will be affected by this Safe Search policy.

You can select a user, a group, or an org unit of users, or all users
