Setting Date and Time Formats in GAT+ or GAT Shield Console

In GAT+ and GAT Shield, we can set the **Date and Time Formats** visible in the **UI** level, as well as the **Import/Export** date format

Each admin can adjust the date and time format.

Change settings in GAT+

In GAT+, **click on your account** name and **Settings**

A new window will be displayed, in the "Common" section, showing all the time and date settings.

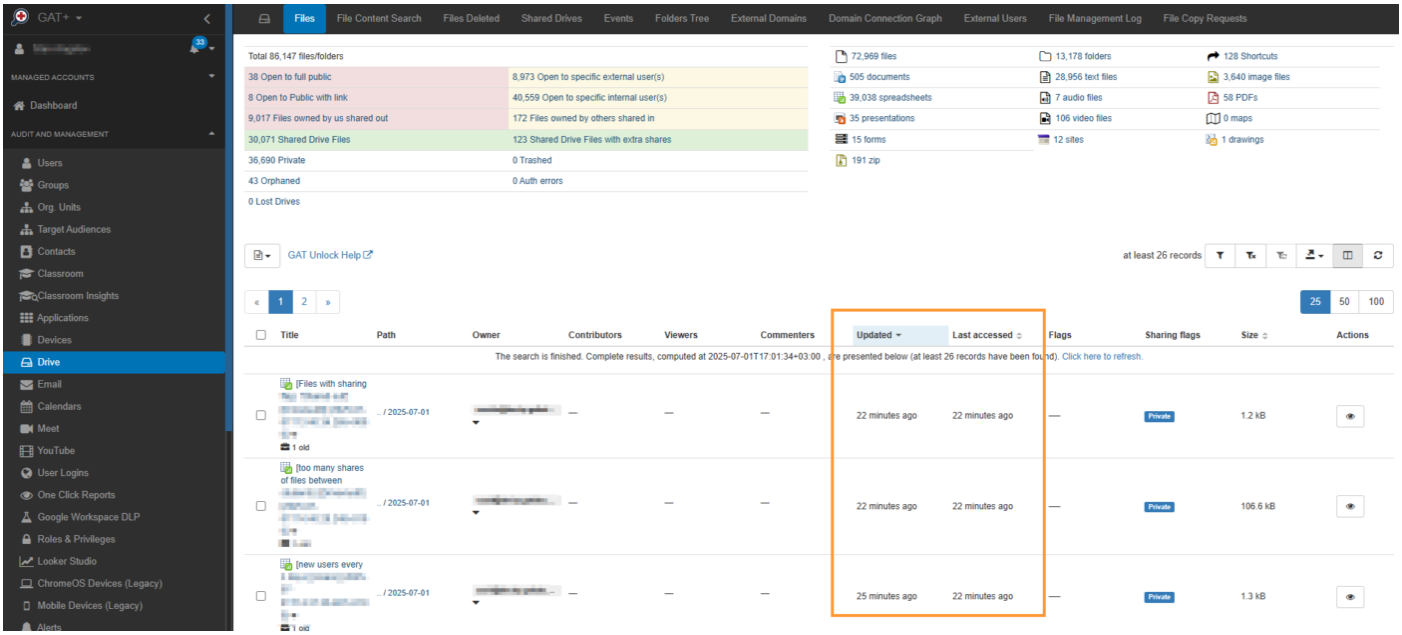

Set up the view according to your preferences and click on the **Save** button.

The Date and Time format will be changed for different audit sections where the **date and time** format is presented.

The **date format for all data of "date and time" will be changed according to the settings applied.**

As an example, in **Drive,** the updated data is presented in date and time format

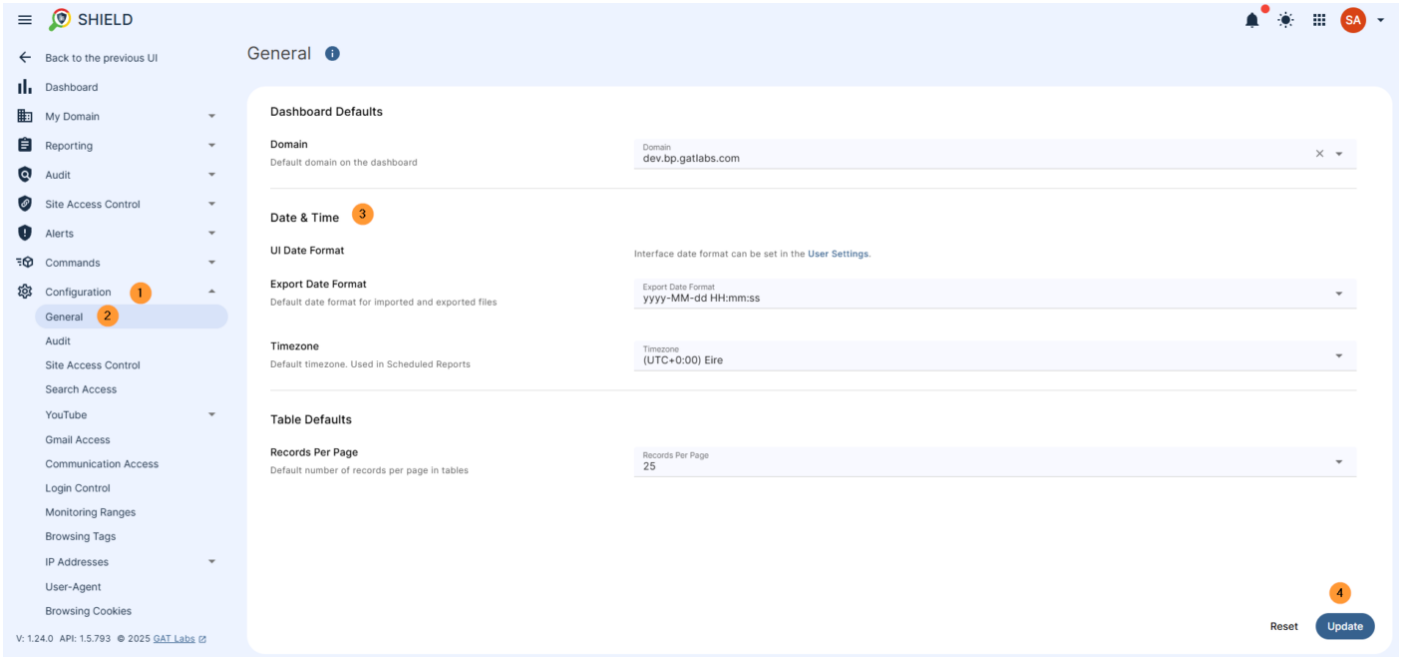

The **UI** will be presented according to the saved settings.

Change settings in GAT Shield

Navigate to **GAT Shield > Configuration > General**

View and audit the Date & Time settings.

Under the **Date format,** select any of the options available and change accordingly.

When ready, click on the **Update** button

Navigating through different sections of the tool

For every tab where the **Date and Time** are presented, it will be displayed in the selected **date format**
