View Messages in an Email Thread

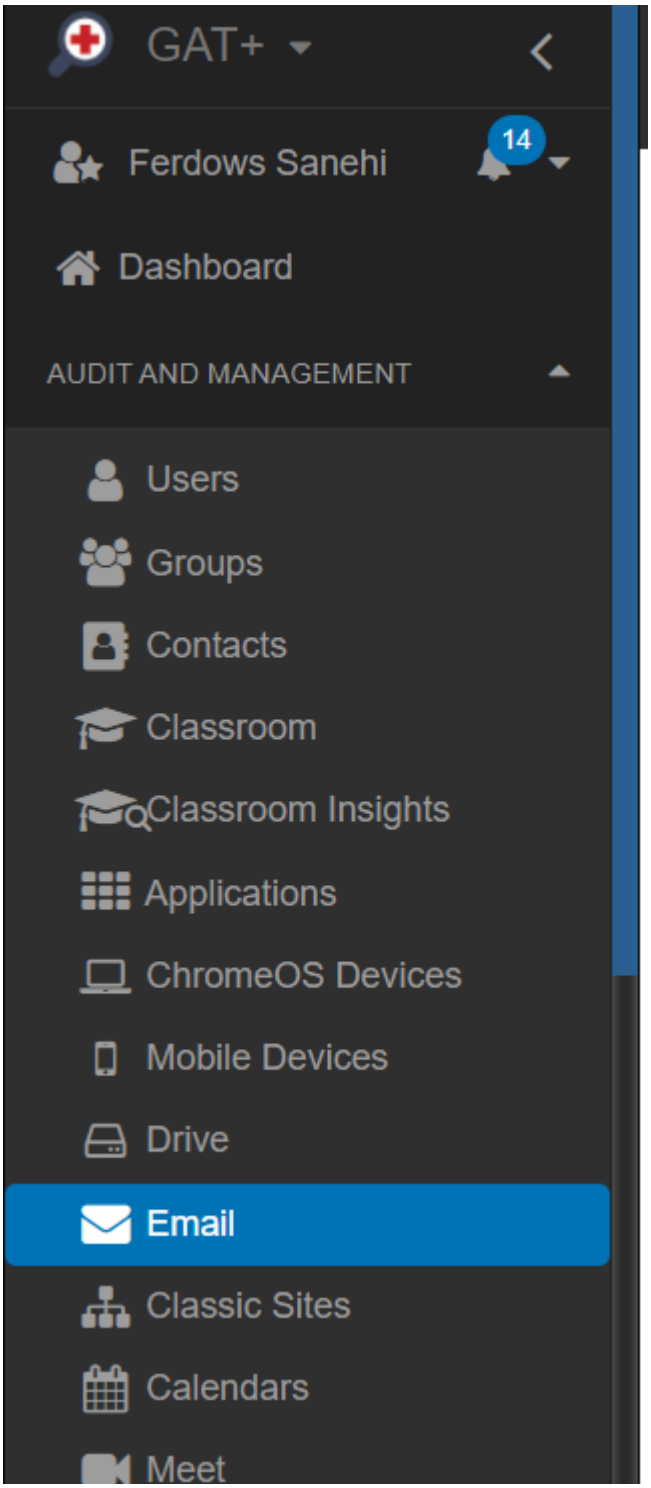

Email Audit & Management · https://gatlabs.com/knowledge/tech-tips/view-messages-in-an-email-thread/

Introduction

GAT+ allows you to gain insight into email activity traffic in your Google Workspace domain. This powerful audit can allow you to achieve better security and awareness around your cloud IT environment.

Getting Started

Navigate to the Email audit menu of GAT+ to get started on viewing email threads in your Google Workspace.

Searching For an Email Message

Click on the Apply Filters button. In the dialog box that appears start by adding search operands. In the below example I chose **From** and **To**.

> we will search for emails between two Users. By Applying the filter the results will follow.

Results - Emails in Thread

By navigating to the '**Show emails in thread' icon**, displayed below, the results will display all the emails in the thread.

Further details can be found by navigating to the **'eye' icon** such as '**email, attachment size, message ID**' etc.

> The results will display data representing email activity such as **Flags, CC, BCC, Date.** **Orange-colored** users indicate they are external from the domain.
